

Ayesha Zargham

Senior Frontend & Full-Stack Developer

 Lahore, Pakistan (Open to Remote Roles)  ayes hazargham19@gmail.com  0321 7764204  linkedin.com/in/ayesha-zargham
 github.com/dev-ayeshazee

Senior Frontend & Full-Stack Developer with 6+ years architecting scalable Angular and React applications backed by robust Node.js and MEAN-stack APIs. Proven track record across enterprise credit management, risk assessment, AI-integrated platforms, and e-commerce products — consistently improving performance, reducing load times, and shipping pixel-accurate, accessible interfaces. Comfortable owning delivery end-to-end, from Figma-to-code translation and frontend state architecture to database schema design and cross-team Agile delivery, for both enterprise clients and high-traffic global platforms.

EXPERIENCE

Senior Fullstack Developer — Freelancing (Part Time)

04/2026 – Present · Remote

- Designed and optimized MongoDB schemas for multi-platform ecosystems, improving query performance and ensuring seamless data synchronization between React/Angular frontends and Node.js backends.
- Architected and managed a multi-platform ecosystem comprising a React application, an Angular application, and a Node.js backend to support multiple high-traffic global websites.
- Transformed complex UI/UX designs from Figma into clean, functional, and highly responsive frontend code, ensuring seamless cross-browser compatibility and mobile responsiveness.
- Implemented robust frontend state management utilizing Redux, streamlining asynchronous data handling and ensuring predictable data flows across user interfaces.
- Enforced code reliability and high-performance metrics by writing comprehensive automated test cases for APIs, successfully handling complex asynchronous workflows and data streams.

React · Angular · Node.js · MongoDB · Redux

Senior Frontend Developer — Websays

04/2024 – 03/2026 · Contract (Freelance), Hybrid

- Collaborated closely with designers to transform Figma designs into pixel-accurate, responsive interfaces while integrating complex REST APIs and optimizing frontend performance (reducing initial load times by 25%).
- Applied Angular best practices, including reusable component design, RxJS-driven data flows, and state management, to maintain a clean, maintainable codebase in fast-paced remote environments.

Angular · RxJS · REST APIs · Performance

Senior Angular Developer — Devstudio International

09/2024 – 12/2024 · Remote

- Owned and resolved 40+ high-priority client issues by debugging complex Angular workflows, improving stability and reliability across credit management and risk assessment modules.
- Developed reusable components and scalable frontend architecture to resolve high-priority workflows, improving module performance by 20% and user task completion rates by 15%.

Angular · Credit Management · Risk Assessment

Angular Developer — IdeaToLife

09/2021 – 03/2024 · Hybrid

- Delivered client-side applications for 5+ diverse projects, consistently meeting enterprise-level scalability requirements.
- Leveraged Angular's core features to create seamless user experiences, maintaining high-quality code standards across all deliverables.
- Participated in daily stand-ups, sprint planning, and retrospectives within an Agile framework to ensure 100% on-time delivery of enterprise project milestones.

Angular · Agile · Enterprise

Frontend Developer — Aquila Techs

07/2021 – 02/2022 · Part Time (Freelance)

- Demonstrated proficiency in a diverse tech stack, encompassing HTML, CSS, and JavaScript, to create visually appealing and highly functional user interfaces on their meal prep app.
- Led the development of dynamic and feature-rich web applications using the Angular framework.

HTML · CSS · JavaScript · Angular

MEAN Stack Developer — Numtra AI

01/2020 – 08/2021 · Onsite

- Designed and managed the frontend for AI-service platforms, integrating APIs from MLFlow, Apache Airflow, and Hadoop.
- Developed Node.js APIs for secure data fetching and storage, improving backend communication efficiency.

MEAN Stack · Node.js · MLFlow · Airflow · Hadoop

KEY PROJECTS

Hoopiz — Credit Management & Risk Intelligence Platform

Directed the Angular 12→18 migration and redesigned credit/risk management dashboards for a financial intelligence platform, including live exposure tracking, payment delay analytics, and risk distribution visualizations.

Angular 18 · Migration · Signals · Data Viz · Fintech

Websays — Social Listening Platform

MediStock

Real-time critical-medicine finder with Redis GEO proximity search, atomic Lua-script stock holds, and BullMQ auto-reclaim.

Fastify · Redis · PostgreSQL · BullMQ · React

Sakai Blog

Multi-channel social listening platform with real-time mention tracking across 150+ data points, sentiment analytics dashboards, and geolocation-based alerting.

[Angular](#) · [Real-Time](#) · [Data Visualization](#) · [Geolocation](#)

Saylogix — Multi-Merchant Warehouse & Fulfillment System

Engineered inbound, stock, and outbound modules with barcode-scanning workflows, real-time operational analytics, and multi-tenant, bilingual (EN/AR RTL) data architecture.

[Angular](#) · [WMS](#) · [Barcode Scanning](#) · [Multi-Tenant](#) · [i18n](#)

Numtra AI — Visual AutoML & Data Science Platform

Built the visual ML pipeline builder, feature engineering UI, model evaluation dashboards (leaderboards, confusion matrices, ROC curves), and one-click staging-to-production deployment.

[Angular](#) · [AutoML](#) · [Data Science](#) · [ML Ops](#)

Zone Healthy — Meal Delivery Platform

Full-stack subscription and customization engine with geo-based delivery validation, loyalty/referral wallet, and JWT-secured account management.

[Angular](#) · [Node.js](#) · [Express](#) · [MongoDB](#) · [JWT](#)

AccuMax — Multi-Tenant AI Tax & Enterprise Platform

Super-admin governance plane, Azure Cosmos DB observability with query-cost scoring, and a safe production script runner with dry-run/execute workflows.

[Angular](#) · [Azure Cosmos DB](#) · [Multi-Tenant](#) · [AI](#) · [DevOps](#)

SKILLS

Frontend: Angular (v2–18), React, TypeScript, JavaScript (ES6+), HTML5, CSS3, Sass, Bootstrap, Tailwind CSS, PrimeNG, Kendo UI

Architecture & Patterns: Component-Driven Design, State Management (NgRx / RxJS / Redux), Lazy Loading, Responsive Design, Cross-Browser Compatibility, Micro Frontends

Backend & Databases: Node.js, Express.js, MongoDB, RESTful APIs, JWT Authentication, PostgreSQL (basics)

EDUCATION

BS Computer Science — FAST NUCES, Lahore (2015 – 2019)

ICS — Kinnaird College for Women, Lahore (2013 – 2015)

CERTIFICATIONS

- Become a MEAN JavaScript Developer — LinkedIn Learning
- Building Angular and Node Apps with Authentication — LinkedIn Learning
- Building RESTful APIs with Node.js and Express — LinkedIn Learning
- Angular Essential Training — LinkedIn Learning

Server-driven infinite-scroll blog platform with JWT-secured writes and an AI content-moderation/tagging pipeline.

[Angular 17](#) · [NestJS](#) · [TypeORM](#) · [PostgreSQL](#)

SmartSplit

Zero-drift bill-splitting engine using integer-cent arithmetic, shared across a real-time Angular Signals UI via SSE.

[Angular 18](#) · [Signals](#) · [Node.js](#) · [MongoDB](#) · [SSE](#)

MockFlow

Stateful API mock sandbox generated from OpenAPI specs, with a deterministic network chaos engine and live telemetry dashboard.

[Fastify](#) · [Redis](#) · [Angular 19](#) · [WebSocket](#)

AI Job Agent

Autonomous job-hunting assistant scraping 4 job boards and scoring fit via Gemini AI, with screenshot-to-job extraction and Discord alerts.

[Node.js](#) · [Prisma](#) · [Gemini API](#) · [Angular 22](#)

Cloud & Big Data: GCP, Microsoft Azure, AWS S3, Hadoop, Apache Airflow, MLflow

Tools & Workflow: Git (GitHub/GitLab/Bitbucket), Docker, Agile/Scrum, Jira, Trello, Figma, Postman, VS Code, AI-Assisted Debugging

Soft Skills: Problem Solving, Team Collaboration, Client Communication, Mentorship, Remote Work Adaptability
